Avery Fernandez Mavrovounioti

UI/UX Designer & Full-Stack Developer ○ averymvr.github.io ○ aands.design.development@gmail.com

I use my scientific, artistic, and interpersonal skills to build intuitive, accessible, and visually appealing websites/apps.

EXPERIENCE

Design & Creative Director | Freelance

MARCH 2026 - NOW — LOS ANGELES, CA

- Led design and creative direction for a mobile and web healthcare platform with secure, role-based access control, from concept to launch.
- Designed a marketing and booking website, patient and clinician app, and admin console using **Figma**, **Flutter**, **Next.js**, and **Tailwind** CSS, ensuring visual consistency with the client's brand identity while delivering an intuitive user experience across desktop and mobile devices.
- Launched a public site with Lighthouse scores of 100 Performance, 100 SEO, and 96 Accessibility (desktop, July 2026).

Front End Lead | Summit Tech Lab

SEPT 2022 - MARCH 2023 — IRVINE, CA

- Led front-end development of a QR-based advertising platform that delivered dynamic content to large-scale projected displays, enabling the client to monetize their technology.
- Developed a full-stack **Angular** application with **SQL** database integration and RESTful APIs, enabling seamless communication between customer-facing and administrative systems.
- Successfully implemented interfaces for both customer slot reservation and large projected displays for real-time advertising.

BlueBox Forum website

MARCH 2022 - JUNE 2023 — IRVINE, CA

- Led UX design and front-end development for an international health-tech community forum, enabling users to ask questions and access reliable information about their at-home breast cancer screening device.
- Applied **Agile** methodologies across a 6-person team, prioritizing ease of use and aesthetic consistency without sacrificing functionality.
- Delivered a secure, responsive forum using **React**, **HTML**, **CSS**, **JavaScript**, and **MySQL**.

UX RESEARCH PROJECTS

Insurance Plans Heuristic Evaluation

MAY 2024 - DEC 2024 — ROCHESTER, NY

- Ran a comprehensive heuristic evaluation for a local insurance provider and interviewed 10+ customers to uncover 25 critical usability issues impacting customer decision-making.
- Presented actionable design recommendations that improve clarity, reduce user confusion, and increase confidence during insurance coverage selection.

Layered: Skincare routine app design

MAY 2025 - DEC 2025 — ROCHESTER, NY

- Conducted user research through contextual observations and interviews, synthesizing these findings into personas, user flows, storyboards, and affinity diagrams to identify pain points and inform UX design decisions.
- Designed a high-fidelity mobile app prototype in **Figma** focused on personalized routines, ingredient education, and product compatibility to help users make informed skincare decisions.

EDUCATION

Rochester Institute of Technology

GPA: 3.98/4.0

M.S. - Human-Computer Interaction

University of California, Irvine

GPA: 3.84/4.0

B.S. - Informatics

SKILLS

Design & Research

Figma, Miro, User Research, Usability Testing, Heuristic Evaluation, Iterative Design, Responsive Design, Accessibility, Information Architecture, Persona Development, Competitive Analysis

Deployment

Next.js (App Router, Server Components), React, TypeScript, JavaScript, Firebase (Firestore, Auth, Cloud Functions, Hosting), Stripe, Angular, SQL / MySQL, HTML, CSS, Git

Development

RStudio, Python, C++, Java

M.S. CAPSTONE

Conducted user research (Interviews, Forum Analysis, and Thematic Analysis) with the d/DHH community to explore how mainstream devices can serve as assistive tools, identify usage patterns and accessibility gaps to improve everyday experiences.
